### LinkEX and EUV Services - Updated Policy

LinkEx has adopted a fuel surcharge calculation method for both System and EUV services based on the fuel prices published weekly by the U.S. Department of Energy. This method more closely links the fuel surcharges to prevailing market prices for diesel fuel, and should help LinkEx and its customers respond more quickly to changes in fuel prices in the marketplace.

The surcharge percentage for the LinkEx and for EUV's will be subject to monthly adjustment. The adjustment will be made according to the table below and will be based on the price per gallon of diesel fuel stated by the U.S. Department of Energy.

We will adjust the surcharge on a monthly basis, based on the national average fuel price posted by the U.S. Department of Energy on the last Monday of each month. The effective periods will be from the first Monday in the succeeding month through the end of the month. The surcharge percentage will be reflected on your LinkEx invoice.
